Areas & Projects

Research, Innovation, Development

ONCODIR
Evidence-based Participatory Decision Making for Cancer Prevention through implementation research

HORIZON | 06/2023 – 11/2026
 EU | Role: Partner | ID: 101104777

FU-TOURISM
FU-TOURISM 5.0 – Future-Ready Business Support Ecosystem for Tourism SME Transition to Green

COSME | 09/2023 – 09/2026
 EU | Role: Partner | ID: 101121573

Digi4MSK
Innovation Alliance for Musculoskeletal Health Literacy in the Digital Era.

ERASMUS+ | 10/2023 – 09/2026
 EU | Role: Partner | ID: 101111708

COGREX
Das geschlechtsspezifische Gesicht des Extremismus: Radikalisierung und Gender im 21. Jahrhundert

WZI | 11/2023 – 10/2024
 EU | Role: Partner | ID: 100656541

iMEDCAP
Development of intelligent military capabilities for monitoring, medical care and evacuation for contagious, injured and contaminated personnel

EDF | 12/2023 – 12/2026
 EU | Role: Partner | ID: 101121421

CVDLINK
A federated paradigm of real-world data sources utilization for the empowerment of diagnosis, prognosis and risk assessment of cardiovascular conditions

HORIZON | 01/2024 – 12/2027
 EU | Role: Partner | ID: 101137278

MDR in AIS
Minimizing Door to Reperfusion Times in Drip and Ship Model for Patients with Acute Ischemic Stroke

THCS | 03/2024 – 03/2027
 EU | Role: Partner | ID: FP-1127

ANALYSES FOR INNOVATION PROCUREMENT PROJECT

- 
Wearables
 - Provide vital data of patients or EMS staff
 - Provide automatic alerts on changes of vital data or environmental changes
- 
Advanced Sensors and Materials
 - Alert changes of vital signs of patients or EMS staff
 - Improving EMS staff safety while not hindering them during treatment of patient
- 
Unmanned Automatic Vehicles / Drones
 - Rapid delivery of equipment or supplies
 - Surveillance of dangerous areas to increase safety and situational awareness
- 
Artificial Intelligence and Machine Learning
 - Provide automatically new insights and decision support on the environment as well as for diagnosis, treatment or triage
- 
Virtual Reality / Augmented Reality / Mixed Reality
 - Train more realistic and complex scenarios
 - Reduce costs for complex trainings
- 
Blockchain/Cryptography
 - Improve cyber security of all connected systems
 - Secure sensitive personal data
- 
Telemedicine
 - Provides remotely support of experts
 - Exchange of vital data and patient history
- 
Big data analytics
 - Quick analysis of vast amount of data to get new insights on environment, diagnosis or treatment
- 
Improved LOCs (Lab on a Chip)
 - Rapid and precise detection of diseases
-

Platforms

Platforms are created in many cases to raise awareness and distribute information and data in a specific field of action. Besides standard news and knowledge sections, the online platform include several database-driven modules like courses, tools, methods, solutions etc.

Networks

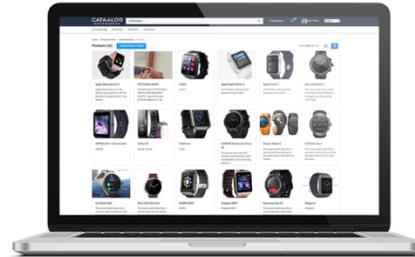

Networks are created to connect stakeholders online for a distinct research area or industry. Modern networks consist of a member section to present organisations and experts with their profiles. Thematic groups are integrated to force smart user interactions.

Project Expertise > Design & Implementation

Web Application Development

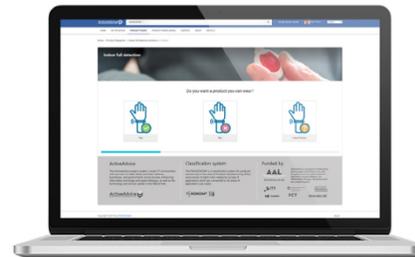

Marketplaces

Marketplaces are designed to provide structured information on suppliers, products, brochures and other related content and news. Entities are presented with a detail page including all relevant meta data and could be favoured and compared in different ways.

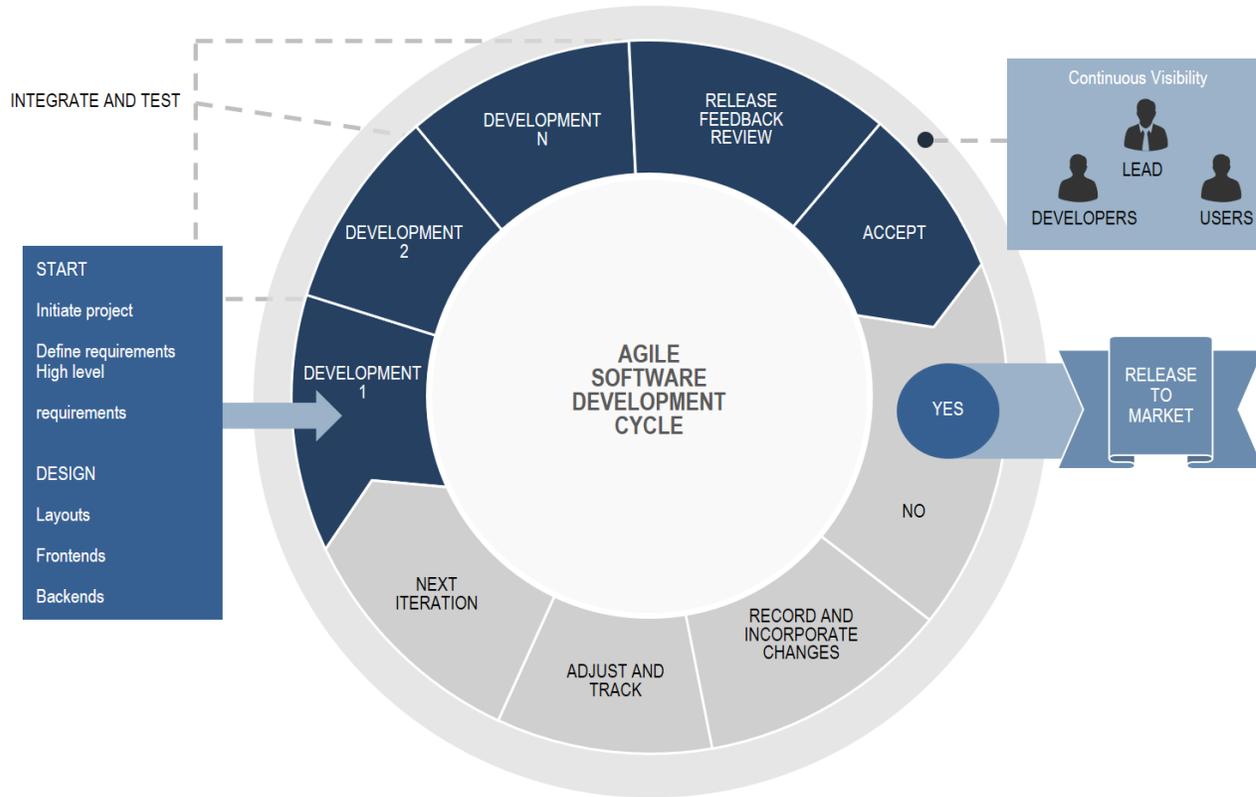

Advisors

Advisors are smart tools supporting the users on finding the right products or any other kind of entity following a multi-step approach. Intelligent query and ranking methodologies in combination with a strong UX are keeping the search and selection process comfortable.

SAVING ENERGY, TOGETHER

Adopting energy efficiency and renewable energy measures helps businesses to be healthy and future-proof. However, businesses, in particular SMEs, often have limited knowledge, resources, and motivation to adopt energy efficiency and renewable energy measures. These individual barriers can be removed by developing energy collectives and by paying attention to multiple benefits.

Smart Advisor

The GEAR@SME project addresses the challenge of increasing energy efficiency and renewable energy in SMEs. The central idea of the project is that support will be coordinated to groups of SMEs, e.g. related to industrial areas or business parks, and provided through an organisation or actor that is already known and trusted by the SMEs.

Together with the methodology, the GEAR@SME project has developed a set of tools to support Trusted Partners and companies in the challenge of improving energy efficiency.

The sets of developed tools are available in several languages (EN, NL, IT, DE, RO)

Training
Material to train Trusted Partners in the fundamental topics that relate to the GEAR@SME approach

Tools
Support tools that SMEs can use in the different stages and situation during the process of the improvement of energy efficiency

Energiebuch E-Tool
Energy tools German SMEs
The Energiebuch E-Tool helps SMEs to evaluate energy consumption data and energy-related key performance indicators over time. With a minimum of work, it is possible to obtain a good overview of all relevant operating data: recording of energy costs, examination of machines and vehicle fleet, and evaluation of CO2 emissions. The results can be compared to sector benchmarks. The tool also provides "add-on modules" (eg. PV calculator, electricity and energy tax rebate, business development plan, CO2 pricing).

Installare Un Impianto FV
Last updated: May 9, 2022

94 views June 13, 2022 Italy

admin April 27, 2022 0 Comments
Dato che le bollette dell'elettricità sono sempre più alte, sto valutando l'ipotesi di installare un impianto fotovoltaico sul tetto della mia impresa. Può avere senso? A chi mi posso rivolgere per avere un parere a riguardo?
[admin Edited question May 9, 2022]

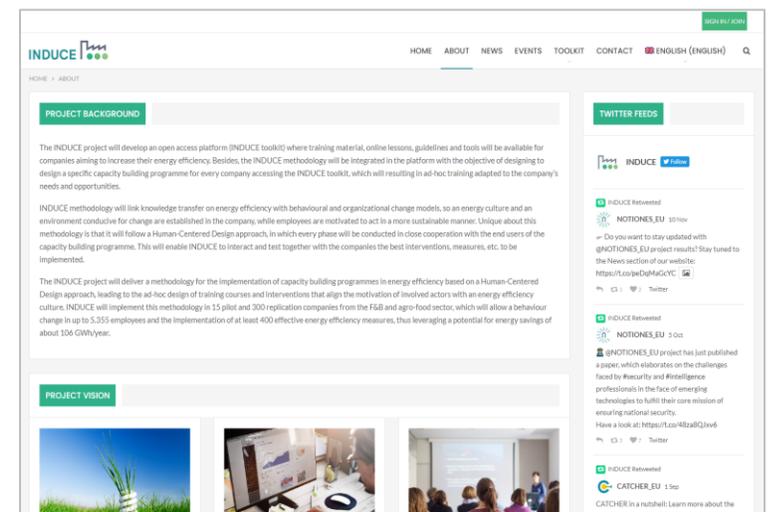

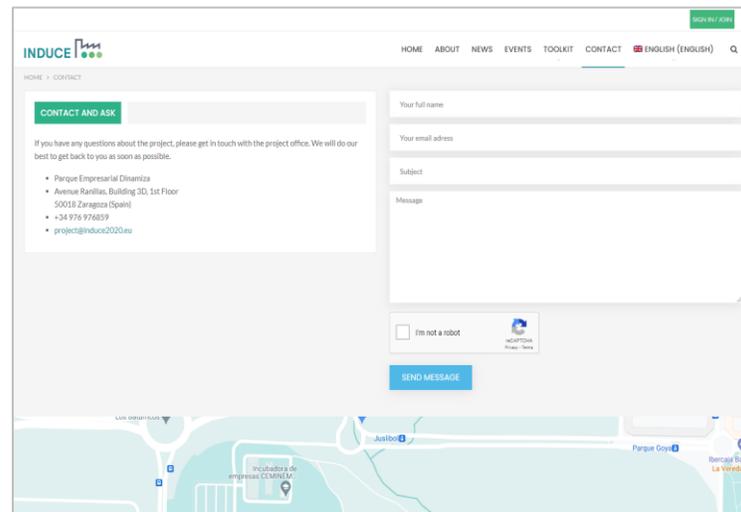

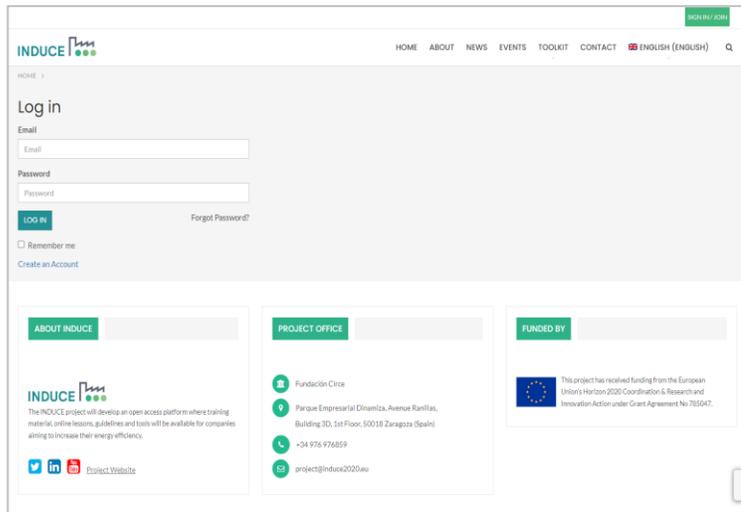

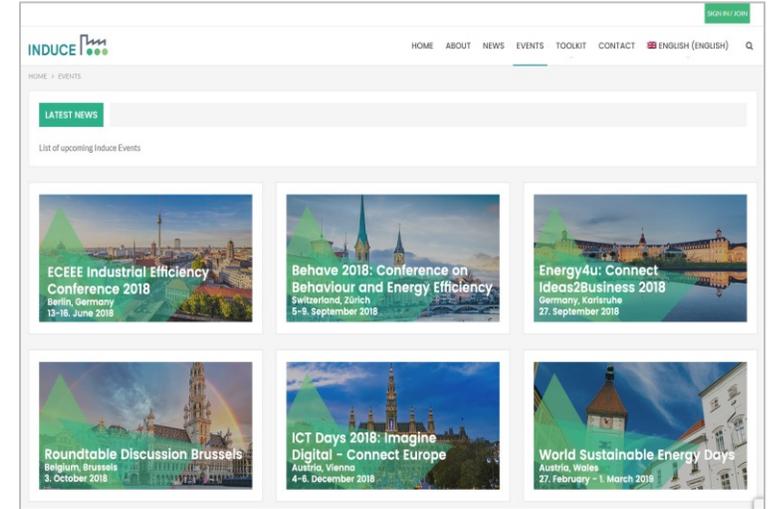

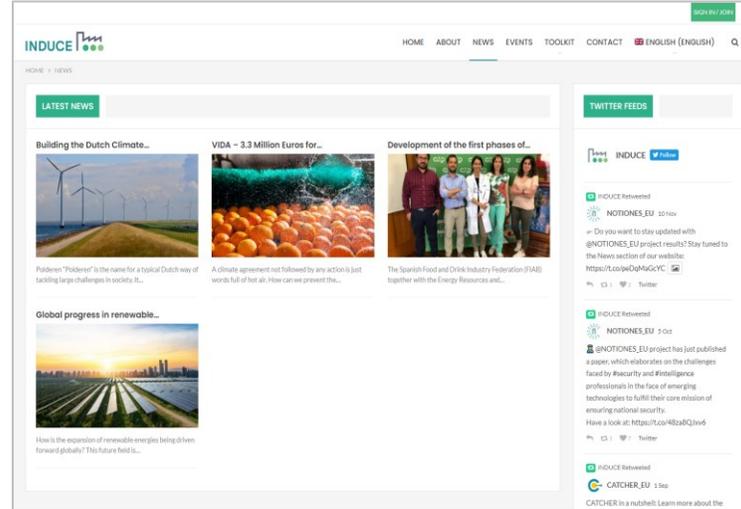

1 Answer

admin Posted April 27, 2022 1 Comment
Sono disponibili agevolazioni fiscali per un'azienda che installa un impianto Fotovoltaico?
[admin Posted new comment June 13, 2022]

admin commented June 13, 2022
L'impianto fotovoltaico è una soluzione per risparmiare sulla bolletta dell'elettricità. È importante, in fase di studio di fattibilità, dimensionare l'impianto correttamente, sulla base del suo profilo di consumo e delle sue esigenze. Se la tua azienda consuma energia elettrica prevalentemente durante il giorno, è possibile produrre e autoconsumare circa il 60-70% dell'energia prodotta dall'impianto. A seguito di una valutazione accurata, è possibile prevedere anche un sistema di accumulo per massimizzare l'energia autoconsumata.
Che altro vantaggio beneficia che da quello ottenuto a bolletta, si riduce infatti l'energia acquistata dalla rete, sono disponibili alcune forme di agevolazione per l'installazione di un impianto Fotovoltaico quali, ad esempio:
Piano di transizione 4.0, che prevede un credito di imposta pari a 4% nel limite massimo dei costi ammissibili pari a 2 milioni di euro
Credito d'imposta.

Showcase: EU-Japan.AI

The Home page features a navigation bar with links for Home, About, Resources, Knowledge, Networking, and Log In. A prominent banner at the top reads "Join the EU-Japan.AI Online Community" with a "Register" button. Below the banner are three main content blocks: "Resources", "Knowledge", and "Networking". At the bottom, there is an "Organisation Mapping" section with a "Show interactive Map" link and a "Recent Discussions" section with a "Show All" link.

The Organisation Map page displays a map of Europe with 496 organizations marked by numbered pins. A search bar at the bottom of the map allows users to "Find a firm" and "Select a category". Below the map, there is a row of partner logos including AIIST, EFFRA, BDV, AI Japan R&D Network, AI Research Centre, and Preferred Networks, Inc.

The Networking page features a navigation bar with links for Home, About, Resources, Knowledge, Networking, and Log In. It includes two featured event cards: "AI4M Workshop" and "DIH Seminar". A section titled "About Our Network" explains the platform's role in connecting researchers and industry specialists. Below this is a "Recent discussions" section with a "VIEW ALL" link and a list of discussion topics with "VIEW DISCUSSION" buttons. A registration form on the right includes fields for Username, Password, and Remember Me, along with "LOG IN" and "Register" buttons.

The Events page features a navigation bar with links for Home, About, Resources, Knowledge, Networking, and Log In. It displays "121 Events" with a "CALENDAR VIEW" toggle. A "Help us improve our directory" section asks for user feedback. The main content area shows a list of "Past events" with details for "Automatica", "IoT Week 2022", "IoT World Solution Congress 2022", and "AKL'22". A search bar and filter options are provided on the left side.

The News page features a navigation bar with links for Home, About, Resources, Knowledge, Networking, and Log In. It includes a "News" section with a brief introduction and a "KNOWLEDGE" toggle. Below the text, there are three featured news articles with images and titles: "Attacking of AI systems through hardware performance", "The City of Kitakyushu's Strategy to Promote Artificial Intelligence", and "Modern production systems push e-mobility".

The Infographics page features a navigation bar with links for Home, About, Resources, Knowledge, Networking, and Log In. It includes three main sections: "Platform Promotional Leaflet", "Project Lessons Learned", and "Survey Results". Each section has a corresponding image and a "DOWNLOAD FILE" button. The "Survey Results" section includes a table with data on survey responses.

SUPPORTING THE WORK OF FIRST-LINE PRACTITIONERS

ABOUT FIRST-LINE PRACTITIONERS

First-line practitioners such as teachers, social workers, youth workers, (mental) health care workers and community police officers are key players in addressing issues of discrimination and prejudice, as well as in early prevention of polarization, radicalization, and violent extremism. FirstLinePractitioners.com provides latest information, practical guidelines, community and exchange as well as trainings and exercises, services and tools for first-line practitioners. As an overall goal, the platform aims at supporting first-line practitioners in their work against group-focused hatred leading to radicalization, violent extremism, and crime. FirstLinePractitioners.com has been developed as part of the EU projects TAKEDOWN, MINDFACT, CHAMPIONS and ASK4UR.

Welcome to ARENA Module

The ARENA Platform has been created to link experts addressing radicalization and polarization. This multi-agency group of experts works together to generate effective and timely responses and preventive measures to address issues and incidents of radicalization, hate and extremism and provide recommendations and support to first line practitioners. To use the ARENA you can: Register as a First-Line Practitioner (FLP) / Expert. FLPs may include community workers, social workers, teachers, youth workers, local government officials, law enforcement officers and more. Here you can provide a brief background of your areas of work and expertise. Connect with other experts, share and review cases of radicalization and/or polarization, recommend actions, and share best practices to help improve prevention and response and support fellow First-Line Practitioners

TRAINING YARD

About the Training Yard

Do you work with young people or in a community and look for answers to address extremism, racism or to engage in democracy work? In the Training Yard you will find relevant resources, country specific information (for Germany, Hungary, Romania and Poland) and diverse training materials to prevent and address extremism and polarization. How can we help you? Select one (or more) of the following questions and access relevant resources and helpful learning materials. Alternatively you can skip this section and enter the Training Yard directly. You can adjust your search on the following page.

New here? A quick guide to the training yard

Get started!

- How should I react to racist remarks and how can I help others with this?
- How can I empower people with egalitarian values?
- What to do if an extremist group plans a public event in my community?
- How can I maintain diversity at my workplace?
- How can I support people who become the targets of extremists?

Showcase: Re-ACT

The screenshot shows the Re-ACT homepage. At the top, there is a navigation menu with links for Home, News & Knowledge, Library, Stakeholders, Projects, and Consortium. Below the navigation is a large video player on the left with a 'Copy link' button. To the right of the video is a 'Welcome to Re-ACT' section with a brief description of the project and three buttons: 'Watch the German Video', 'Watch the Czech Video', and 'Watch the French Video'. Below the video and welcome section is an 'ABOUT' section with a brief description of the project's mission.

The screenshot shows the 'News & Knowledge' page. It features a grid of six article cards. Each card includes a title, a date, a category tag (e.g., 'Knowledge'), a thumbnail image, and a short summary. The articles are: 'Tools, Good Practices And Creative Approaches', 'Comparative Report On Online Antisemitism', 'Antigypsyist & Antisemitic Conspiracy Theories', 'Factsheet - Best Practices Examples & EU Tools', 'Summary Of User Survey And Needs Analysis', and 'Summary Of Re-ACT'S Expert Workshops'.

The screenshot shows the 'Library' page. It features a search bar with the text 'Find knowledge by title' and a 'SEARCH' button. Below the search bar are filter options for 'Filter results' and 'Categories'. The page lists several documents, including 'Mirrors - Manual on combating antigypsyism through human rights education' and 'Training Program. University Diploma in Social Intervention with the Roma Community'. A 'Help us grow our library' call to action is also present.

The screenshot shows the 'Stakeholder Map' page. It features a map of Europe with numbered markers indicating the locations of various organizations. A 'Welcome to our Stakeholder Map' section provides a brief description of the map's purpose. A 'Help us grow our Stakeholder Map' call to action is also present.

The screenshot shows the 'Project Directory' page. It features a search bar with the text 'Find project by title' and a 'SEARCH' button. Below the search bar are filter options for 'Filter results' and 'Countries'. The page lists several projects, including 'Remember and Act' with details such as 'Coordinator: INACH', 'Project Duration: 2020 Feb 01 - 2022 Jan 31', and 'Project language: English'.

The screenshot shows the 'Consortium' page. It features a search bar with the text 'Search' and a 'SEARCH' button. Below the search bar is a list of consortium members: INACH, LICRA, ROMEA, and SYNYO. A map of Europe is also displayed, showing the locations of the consortium members. A 'Help us grow our Project Directory' call to action is also present.

HOME ABOUT CONSORTIUM RESOURCES COLLABORATION NEWS CONTACT

Welcome to SciShops Collaboration

SciShops.eu Collaboration is a virtual meeting space for all stakeholders who are working in or are interested to work closer with their communities through Community Based Participatory Research Initiatives. They can connect with local and international experts, CBPR practitioners, public administrations, companies and community organizations to exchange knowledge and experiences, share or seek jobs, Partnerships, Funding, Staff Exchanges, Twinning and Mentoring opportunities. You can connect in and create various public and private groups, run conversations, share documents contact members directly, and link groups to existing CBPR initiatives already on the platform.

If you have any questions that might be of wide interest for the research community or for engaging civil society in your actions, feel free to share them on our Q&A board.

Moving networking and engagement activities online

4.85K views | December 16, 2022 | I am a researcher | Selected 1

Anna June 1, 2020

Hi everyone, I'm looking for top tips for going online with networking or matching events (that would usually be done face-to-face). How do we get people who have never met to engage and find out about each other over a zoom room rather than a coffee? Would love to hear from you if you have experience to share or any ideas! Thanks, Anne

Showcase: eMAPs

SYNYO

eMAPs

Project Identity | Project Website | Print Materials | Social Media | Sales Kits | Product Folders | Videos

PROJECT BACKGROUND

The eMAPs consortium develops a disruptive Localisation Based Service (LBS) in its Galileo-based project, to tackle the foreseen and expected smart city and autonomous car challenges.

The hardware and software developments of eMAPs aim at providing future solutions such as smart navigation for connected car users, fleet management for city public transport and infrastructure maintenance monitoring for city planners. By developing an innovative, low-cost, compact, high performance premium receiver, eMAPs will provide a targeted 30cm vehicle's position accuracy and high definition urban maps which will benefit to all smart cities' stakeholder groups: the travellers, the public transport operators and the urban authorities.

PROJECT OBJECTIVES

- PROVIDE future solutions such as smart navigation for connected car users, fleet management for city public transport as well as maintenance monitoring for city planners
- DEVELOP a low-cost, cloud-based multi-sensor premium mass market platform which will hybridize data generated by a multi-frequency multi-constellation GNSS receiver, an IMU and cameras
- TEST the developed prototype, using test vehicles equipped with a reference trajectory system to obtain exact positioning with cm-level accuracy
- ENHANCE scalability, near real time map updates and higher accuracy to new users, which cannot be met by the current business model

GaliGo

How to revolutionize the future of Smart Cities by connecting communities?

www.emaps.eu | www.galigo.eu
contact@3daerospace.eu

Solution Background

GaliGo is a smart city solution powered by 3D Aerospace, a young tech start-up specializing in high-accuracy positioning and 3D mapping technology. Its three core competencies are related to the design and manufacturing of its GNSS connected receiver (eHermes), big data and high-definition 3D maps.

Customer Types:

- Public Authorities
- Private Companies
- Citizens

3D & HD City Mapping
To offer a connected map updated in real time with the latest data collected.

Public Transport Information
To allow citizens to locate their next bus at all times and with unprecedented precision.

Real-time Traffic Updates
To identify and communicate accidents and other inconveniences faster than ever before.

Delivery Tracking
To provide information on missing deliveries due to unpunctual carriers or impractical schedules.

Road Anomaly Detection
To automatically detect and locate road anomalies such as roadworks or holes in the road.

Fleet Management
To proposing the best and most efficient itineraries to road users.

We are developing

- High-accuracy data collection, for a fully-integrated and complete database
- Real-time image processing, to detect anomalies via high-speed image recognition
- Connected maps of the city, using geolocation data to open doors for new applications

Let's team up, let's build the solution of tomorrow together.

European Global Navigation Satellite Systems Agency

eHermes Receiver

- Geolocation in real-time
- Galileo E6 compatible
- Ability to incline 180°
- Embedded system is compatible to be placed in any kind of metal structure
- Measurements: 30x30x30 cm

- Triple frequency GNSS antenna
- Solar panels
- Embedded HD cameras
- Rotary joints
- Flexible locking mechanism

Smartphone Application

- Real-time navigation
- Geotagged information
- Connected maps
- Main interface with customers
- Customised application
- Online assessment

Database

- Real-time assessment
- Automatic infrastructure object detection
- Up to date HD map
- Customised Application

eMAPs Starting Point

Advantages:

- Scalability thanks to the cloud elasticity.
- Possible near real time map thanks to crowdsourcing scheme.
- Users will benefit of a greater accuracy than smartphone or PND.

Drawbacks:

- Cybersecurity (data protection & anonymization).
- Penetration of the market

Showcase: MAGDA

MAGDA

Project Identity | Project Website | Print Materials | Social Media

Project Background

The MAGDA project aims at developing a toolchain for atmosphere monitoring, weather forecasting, and severe weather/irrigation/irrigation monitoring advisory with GNSS (including Galileo) at its core to provide useful information to agricultural operators. Specifically, MAGDA will deal with the assimilation of different satellite-borne, drone-borne, ground-based weather radars, and in-situ weather observations into very high-resolution numerical weather prediction models. The project addresses the provision of meteorological products for severe weather warnings and advisories to farmers by either a dedicated dashboard or by interfacing with a Farm Management System. The objectives of MAGDA go beyond the state-of-the-art by aiming at developing a modular system that can be deployed by owners of large farms directly at their premises, continuously feeding observations to dedicated and tailored weather forecast and hydrological models.

MAGDA Objectives

- EXPLORE** the untapped potential of assimilating GNSS-derived, drone-derived, Copernicus EO-derived datasets, and in-situ weather sensors
- DEVELOP** high-resolution and short-range numerical weather forecasts and hydrological models for irrigation performance and water accounting
- PROVIDE** valuable information about severe weather and irrigation operations directly to farmers and agricultural operators
- ENABLE** augmented short-term weather forecasts and irrigation advisories to farmers by a dedicated dashboard and APIs
- DEPLOY** sensors, GNSS and drones, to monitor atmospheric variables at high spatial resolution in the vicinity of large farms and cultivated areas
- VALIDATE** very-short range nowcasting systems for the prediction of severe weather in support of precision agriculture activities
- INCREASE** awareness and impact through effective and measurable communication and dissemination activities

Project Facts
